Lutfir Rahman Saipudin

Software Engineer (Web & Mobile Development)

+60 11 1058 5345 | lutfirrahmansaipudin@gmail.com | 42700 Banting, Selangor Darul Ehsan

Profile Summary

Results-oriented Software Engineer undergraduate with strong hands-on experience in Flutter, Laravel, and full-stack web development. Proven ability to deliver scalable, production-ready applications through effective API integration, systematic debugging, and cross-functional collaboration. Experienced in building government and enterprise-grade systems with a focus on performance, usability, and reliability. Seeking an entry-level Software Engineer / Graduate Software Engineer role to contribute to high-impact software solutions.

Technical Skills

Languages: JavaScript, PHP, Dart, Java, C, C#, C++
Frameworks & Tools: Laravel, Flutter, Android Studio
Web Technologies: HTML5, CSS3, RESTful APIs, JSON
Databases: MySQL (Relational), basic NoSQL concepts
DevOps & Collaboration: Git, GitLab, Version Control, UAT Support
Design & UX: Figma, Wireframing, UI/UX Design
Practices: MVC Architecture, SDLC, Agile, Debugging & Troubleshooting

Professional Experience

Internship Trainee – Technical & Project Department Aug 2025 – Jan 2026
Isianpadu System Sdn Bhd

- Developed and deployed Flutter mobile modules for a government LTAT application, serving military fund members with secure and reliable digital services.
- Integrated RESTful APIs, multilingual support (Bahasa Melayu & English), and modern UI components, improving usability and data consistency during UAT.
- Designed wireframes and high-fidelity UI mockups using Figma for LTAT and ePusara systems, ensuring compliance with government accessibility standards.
- Contributed 30+ GitLab commits and merge requests, collaborating with developers, QA, and project managers to maintain code quality and on-time delivery.
- Resolved critical issues including API failures, OpenAPI schema errors, and Flutter Google Maps integration bugs, maintaining approximately 99% system uptime during UAT.
- Supported User Acceptance Testing (UAT) and deployment activities, ensuring features met functional and performance requirements.

Internship Trainee – IT Department Jan 2021 – June 2021
Selangor Matriculation College

- Managed and updated the departmental website, ensuring 100% content accuracy and improved usability for 1,000+ active users.
- Assisted in processing and printing 500+ student ID cards, streamlining administrative workflows and reducing processing time.
- Performed routine IT maintenance, including hardware diagnostics and software updates, achieving 99.9% system uptime.
- Delivered on-demand technical support to students and staff, resolving issues efficiently and minimizing operational downtime.
- Collaborated with IT teams on infrastructure and web-related projects, strengthening practical experience in IT operations and web systems.

Project Experience

- **LTAT Mobile Application – Military Fund Member Services Platform**
  - Developed a Flutter-based mobile application for Lembaga Tabung Angkatan Tentera (LTAT), delivering modules such as FAQ, Contact Us, and Death Withdrawal.

- Implemented full API integration, platform-based filtering, multilingual support, skeleton loading, pull-to-refresh, and Google Maps integration.
- Collaborated via GitLab and delivered features validated through User Acceptance Testing at LTAT Bukit Bintang headquarters.

- **ePusara – Digital Cemetery Management System (Government Project)**
  - Designed UI workflows and landing pages for a municipal digital cemetery system used by Majlis Bandaraya Johor Bahru (MBJB).
  - Produced high-fidelity mockups and wireframes in Figma, improving usability and aligning with government accessibility requirements.
  - Conducted UX research and requirement analysis, increasing stakeholder satisfaction and interface clarity.
- **Momentify – Facial Recognition Photo Management System**
  - Built a scalable web-based photo management platform using facial recognition to optimize image retrieval at large events.
  - Created specialized roles, such as Event Manager, to reduce administrative workload and streamline event-specific content management and folder creation.
  - Conducted functional, performance, and user acceptance testing, resulting in improved system performance and user satisfaction through effective search features and role management.
- **KOOPUO: E-Commerce Platform for PUO Cooperation**
  - Developed a full-stack e-commerce platform enabling online sales, booking, and inventory tracking.
  - Implemented a student booking system and storage management module, improving stock visibility and operational efficiency.

Education

Bachelor of Computer Science (Web Technology) With Honours — Oct 2022 – Jan 2026
Universiti Tun Hussein Onn Malaysia (UTHM) — **CGPA: 3.17**

Relevant Coursework: Computer Architecture, Systems Analysis and Design, Fundamentals of Web Technology, Web Service Technology, UI/UX Design, Content Management System, Web Development, Web Security, Artificial Intelligence, Database Management.

Diploma in Information Technology (Digital Technology) — June 2019 – June 2021
Polytechnic Ungku Omar — **CGPA: 3.59**

- Achieved Dean's List Award in semester 3 until semester 5.

Activities and Involvements

- Achieved First Runner-Up in the 'Business Website Challenge', demonstrating strong web development skills and innovative solutions.
- Completed the Laravel Bootcamp on Web Development Using ChatGPT, gaining proficiency in modern web technologies and AI-driven development.
- Successfully participated in the 'Build Your FYP with Laravel' Bootcamp, enhancing practical knowledge of Laravel framework and its application in developing final year projects.
- Completed intensive Flutter training on AI chatbot integration, payment gateways, and app deployment, immediately applying skills to refactor codebase and improve application maintainability.

Skills and Proficiency

- Fluent in Bahasa Melayu and intermediate in English.
- Proficient in Microsoft Office (Word/Excel/PowerPoint).
- Basic knowledge in HTML, CSS, JavaScript, PHP, JAVA, C, C#, C++, Laravel, MySQL, Dart Programming, and Android Studio.
- Skills in building and styling web pages.
- Knowledge of relational and non-relational databases.
- Ability to troubleshoot, debug, and resolve technical issues efficiently.

- Understanding of the stages in software development.
- Familiarity with version control such as Git.
- Ability to diagnose and resolve IT issues.
- Adept at working collaboratively in team environments.
- Open to new ideas and willing to learn new ways of doing things.
